Portfolio: <https://michaelzalamedaportfolio.netlify.app/>

Education

San Diego State University, (SDSU), San Diego, CA

2021-2025

- B.S. in Computer Science, Expected May 2025
- GPA: 3.8 | Magna Cum Laude | Dean's List (2021-Present)

Technical Skills/Courses

Languages - Python, C, C++, C#, HTML, JavaScript, CSS, MySQL/SQL, R, Haskell, Prolog, MIPS Assembly

Technologies & Tools - Git, GitHub, Unity, Linux/Unix, VSCode, Eclipse, Jupyter Notebooks, LaTeX, Shell Scripting, Raspberry Pi

Software Courses - Neural Networks, Computer Security, 3D Game Programming, Intro to AI, Database Theory Implement, Computational Linguistics, Algorithms, Data Structures, Operating Systems

Hardware Courses - Computer Architecture, Wireless Networks

Math & Supporting - Discrete Mathematics, Linear Algebra & Differential Equations, Physics I & II, Probability & Statistics, Calculus I & II

Experience

US Radiology On-Call - Clinical Assistant and Data Management

May 2022 - Present

- Provided clinical and technical support by processing radiology scan data, resolving IT issues, and facilitating communication between medical staff and physicians.

Self-Employed - Personal Tutor

Aug 2017 - May 2021

- Delivered personalized instruction in mathematics (Calculus, Physics) and Java programming, strengthening students' problem-solving and logical reasoning skills.

Projects

Privacy in Healthcare - Python, Neural Networks

- Implements a deep learning model using the UCI Heart Disease dataset to predict the likelihood of heart disease, followed by the implementation of a privacy-preserving version of the model, which will use differential privacy techniques to protect sensitive data.

Smart Laundry - Python, Linux, SMTP, Orange Pi Zero 3

- Utilized an Orange Pi Zero 3 as a central controller to transform any washer or dryer into a smart device capable of sending real-time notifications upon finishing and allowing users to focus on other tasks without constantly checking the laundry room.

Facial Recognition AI - Python, Neural Networks

- An intelligent system capable of recognizing individuals with high accuracy in live time amidst varying environmental conditions, lighting, and facial orientations.

Heroes and Knights 2D Platformer - Unity, C#

- A 2D platformer made in Unity that involved scripting, UI, and graphic design.

Summary

Detail-oriented and technically driven Computer Science senior at San Diego State University with a 3.8 GPA and Magna Cum Laude honors. Proficient in Python, C/C++, SQL, and Linux with hands-on experience in machine learning, systems programming, and game development. Demonstrated ability to apply technical skills through impactful personal projects, including AI-driven healthcare models and embedded smart devices. Strong communicator with real-world experience in tutoring and clinical IT support.
